CoP Conformity of Performance

Products of the brand Vatette, are made of DZR brass. All products have Swedish type approvals and meet the limit for lead precipitation of 5µg. This means that our Vatette products already today comply with the new product regulations for water and sewage systems that came into force on 1.1.2020.

The following types of products meet current standards for each product type as well as new Finnish requirements, in accordance with the Ministry of the Environment's ordinance

3/19 type approval of pipe fittings of brass and copper intended for water installations in buildings.

6/19 type approval of shut-off valves intended for water installations in buildings
